CRAIG ANDERSON
Research Scientist
Information Sciences
Teledyne Scientific Company

Craig Anderson is a research scientist in the Information Sciences Division of Teledyne Scientific Company. At Teledyne Scientific, he is the lead software architect and program manager on several software projects.

Anderson joined the company in 2002. He has more than 17 years of experience involving all aspects of software development, including architecture, design, project management and product marketing. Areas of expertise include UML architecture and design, software methodologies and information security.

In 1998, Anderson co-founded Security Force Software, a company that developed information security software. The flagship vulnerability scanning product, SFProtect, was developed in less than nine months and contained several innovations that enabled security policy to be automatically enforced through a centralized management interface. In 1999, Anderson guided the company through a successful acquisition by Hewlett-Packard.

Anderson graduated with honors from the University of Wisconsin-Stout with a bachelor's degree in applied mathematics and is a Certified Information System Security professional (CISSP).
